Assembly Instructions

Before You Start

It is extremely important that these instructions are read carefully and any illustrations studied before commencing installation.

Please retain these instructions for future reference.

Warning!

- Electricity can be dangerous.
- This product must be installed and maintained by a suitably certified installer in accordance with the current applicable regulations and related legislation.
- Installation to comply with current wiring regulations.
- The lighting is for use in a normal dry domestic indoor environment.
- If you find any damage to the external cables, and electrical parts, please ask a qualified electrician to replace it.

Installation

- Take care when handling and installing to avoid damage to the product.
- Avoid mounting the fitting on a damp surface such as a newly painted or plastered area as this may cause discoloration of the finish

Cleaning Instructions and Care

- Take extra care when cleaning and assembling.
- Do not use any chemical or abrasive agents to clean the shade

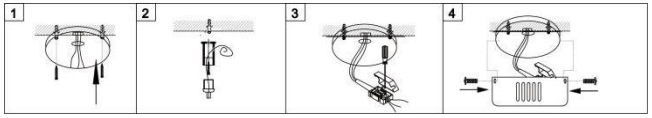

General Assembly

Part 1: Prepare

- Unpack your new fixture
- Turn off the power
- Check your support
- Check the junction box

Part 2: Installation

1. Make sure that the power source is still accessible.
2. Determine the pendant light's position. To ensure accuracy, first, draw the hole's position on the ceiling surface using the metal bracket before drilling holes in the ceiling surface to fit the ceiling mounting light.
3. Install the raw plugs to the ceiling.
4. Install the metal bracket onto the ceiling using the screws.
5. Use the connector block or lightbox to connect the pendant's circuitry to the main power supply.
6. Adjust cord length to suit..
7. Assemble the cables and drivers in the ceiling canopy cup, then secure it in place.

8. Turn the power back on.
9. Complete the installation.

1 Light Pendant Lamp

Product Details

Product Code:
CP0190

Voltage Input
110V-240V~50-60Hz

Output
3000K LED

Bulb Replacement

- LED Strip or LED Driver
- To be replaced by Certified Electrician
- Dispose of old LED with care
